Dancing frocks are sure to be in de

Dancing frocks are sure to be in demand at this season, and here is a most attractive one. It is charming for the boarding school girl and for the college student, and it also will be found good for the debutants. It is a very pretty model and a very simple one, girl-like and at the same time essentially amart. The skirt is made with three gath-ered founces of low arranged to the same

amart. The skirt is made with three gathered flounces of lace arranged over a foundation. The bodice is made with the guimpe portions arranged over a lining and with an over-bodice which is finished separately. Here the over-bodice is made of rose colored taffeta, and the combination of that color and material with the white lace is exceedingly attractive. As will be seen by one of the small views, the flounces can be accordion plaited in place of gathered, if chiffon, silk voile or a similar material is used, and the plaiting makes a very pretty effect, flaring prettily and becomingly, while it and the gathered flounces are equally fashionable. There is almost no labor required for the making of the skirt as illustrated, since there are only the two seams in the foundation and the lace requires only to be gathered and arranged over it. The bodice, too, is a very simple one, easy to make and always satisfactory. If something still more youthful than the lace were wanted, it would be pretty to make the over-bodice, as it is here, of the silk, and the founces and guimpe portions of net, silk voile or marquisatts.

of the silk, and the flounces and guimpe por-tions of net, silk voile or marquisette. Any one of these made into gathered flounces with the edge hemmed and finished with rows of narrow velvet ribbon would make an ex-ceedingly smart effect, and the ribbon always has the advantage of accentuating the flare. For the 15-year-size will be needed for the over-bodice 1 yard of material 27 inches wide.

over-bodice 1 yard of material 27 inches wide.
% yard 36 inches wide, ½ yard 44 inches wide; for the guimpe portion will be needed 1% yards 27 inches wide, 1½ yards 36 inches wide, 1½ yards 44 inches wide. The skirt will require 2½ yards of material 36 inches wide, and for the flounces will be needed 8½ years.

It for Misses 19 inches wide. The bodice pattern, No. 8803, and the skirt patern. No. 3608, are both cut in sizes for 16 and 18 years.

Call at THE EVENING WORLD MAY MANTON FASKION BUREAU, Donald Building, 100 West Thirty-second Street (oppo-site Gimbel Bros.), corner Sixth Avenue and Thirty-second Street New York, or sent by mail on receipt of ten cents in coin or stamps for each pattern ordered.

IMPORTANT—Write your address plainly and always specialse wanted. Add two cents for letter postage if in a hurry.

STETSON—the Ideal Fall Hat for Men and Young Men

a Stetson almost anywhere, but if you are wise you will come to GIMBELS for it, and find a larger number of styles, a wider variety in addition six exclusive and

very smart Stetsons that only GIMBELS can show you at \$3.50, \$4 and \$5

The new ideas for Fall are full of "go" and individuality. They betray their origin—there's something indefinable about a Stetson that prevents comparison with the ordinary run of hats. ESPECIALLY the case with the ordinary run of hats.

Have you seen the "Comfort" Derby? It is made (by an entirely novel idea) so that it conforms to the head at first wearing as easily as does last year's old weather-worn soft felt.
